

SRV Task  
Source 079  
10 July 1987

*20-24 July*

I could see a picture of some type of red energy rising from the ground. I could see land and buildings. I kept getting the feeling that I was looking at an explosion or the effects of an explosion after an occurrence. Or I felt I could have been at a test site.

I also kept seeing tubes or bottles being held by people and I still kept getting the feeling of testing.

At one point I think I smelled milk.
